The Kalamazoo - Loose Leaf Binder

Is your Accounting Department efficient?

It is not enough to have your Manufacturing Departments fitted with the most modern equipment and your Sales force keyed up to the highest degree, if your Office staff is doing its work in much the same old way as years ago.

The advance in Bookkeeping methods has been quite as marked as in other branches of business, and the systems of yesterday must give place to those of to-day.

The Kalamazoo Loose Leaf systems are modern in every way. They are the last word in Accountancy, whether for hand posting or machine ledger work.

There is a "Kalamazoo" device for every office need, and we should like the opportunity of showing them to you.

Write us of your problems and let us help you.

The Making of Books

THE Printing and Binding of Books is a business requiring special knowledge, skill, aptitude and taste. Printing is not merely the mechanical operation of putting words into type and impressing them upon paper. It is much more than that. In the making of Books or Catalogues every detail of the work must be planned. The purpose of the book and the class of readers to be reached is the first consideration; and the most suitable size, the type to be used, the style of the illustrations, the quality, color and texture of the paper, the material and shade of the binding, the cover design, and even the wrapper itself, must all be in harmony with it.

The reader of a book or the buyer of goods from a catalogue does not stop to analyse what it is about a book that impresses him—the general effect alone counts. But as books, primarily, are made to read and not to merely look at, the first place belongs to the author; and stock, design, workmanship, illustrations and binding, must be subordinate to his work and in harmony with it.

The Printing and Binding of Books is our business. We make Books, Catalogues, Booklets, etc.; doing every part of the work in our own splendidly equipped plant, and with a thoroughly experienced staff of trained workmen.
